Magoya

A hands on consultancy in software and AI for agribusiness.

A product succeeds when it gets used.
We work across the three spaces where the problem lives: strategy, design and build, and adoption and usage.

Why choose Magoya?

Five things that don't usually come together.

Domain fluency

Agronomists, engineers, designers, product managers, customer success and field trainers on the same team.

Hands on

We don't hand over a recommendation and leave. We help build what we propose and partner with you until the outcome is delivered.

Outcome driven

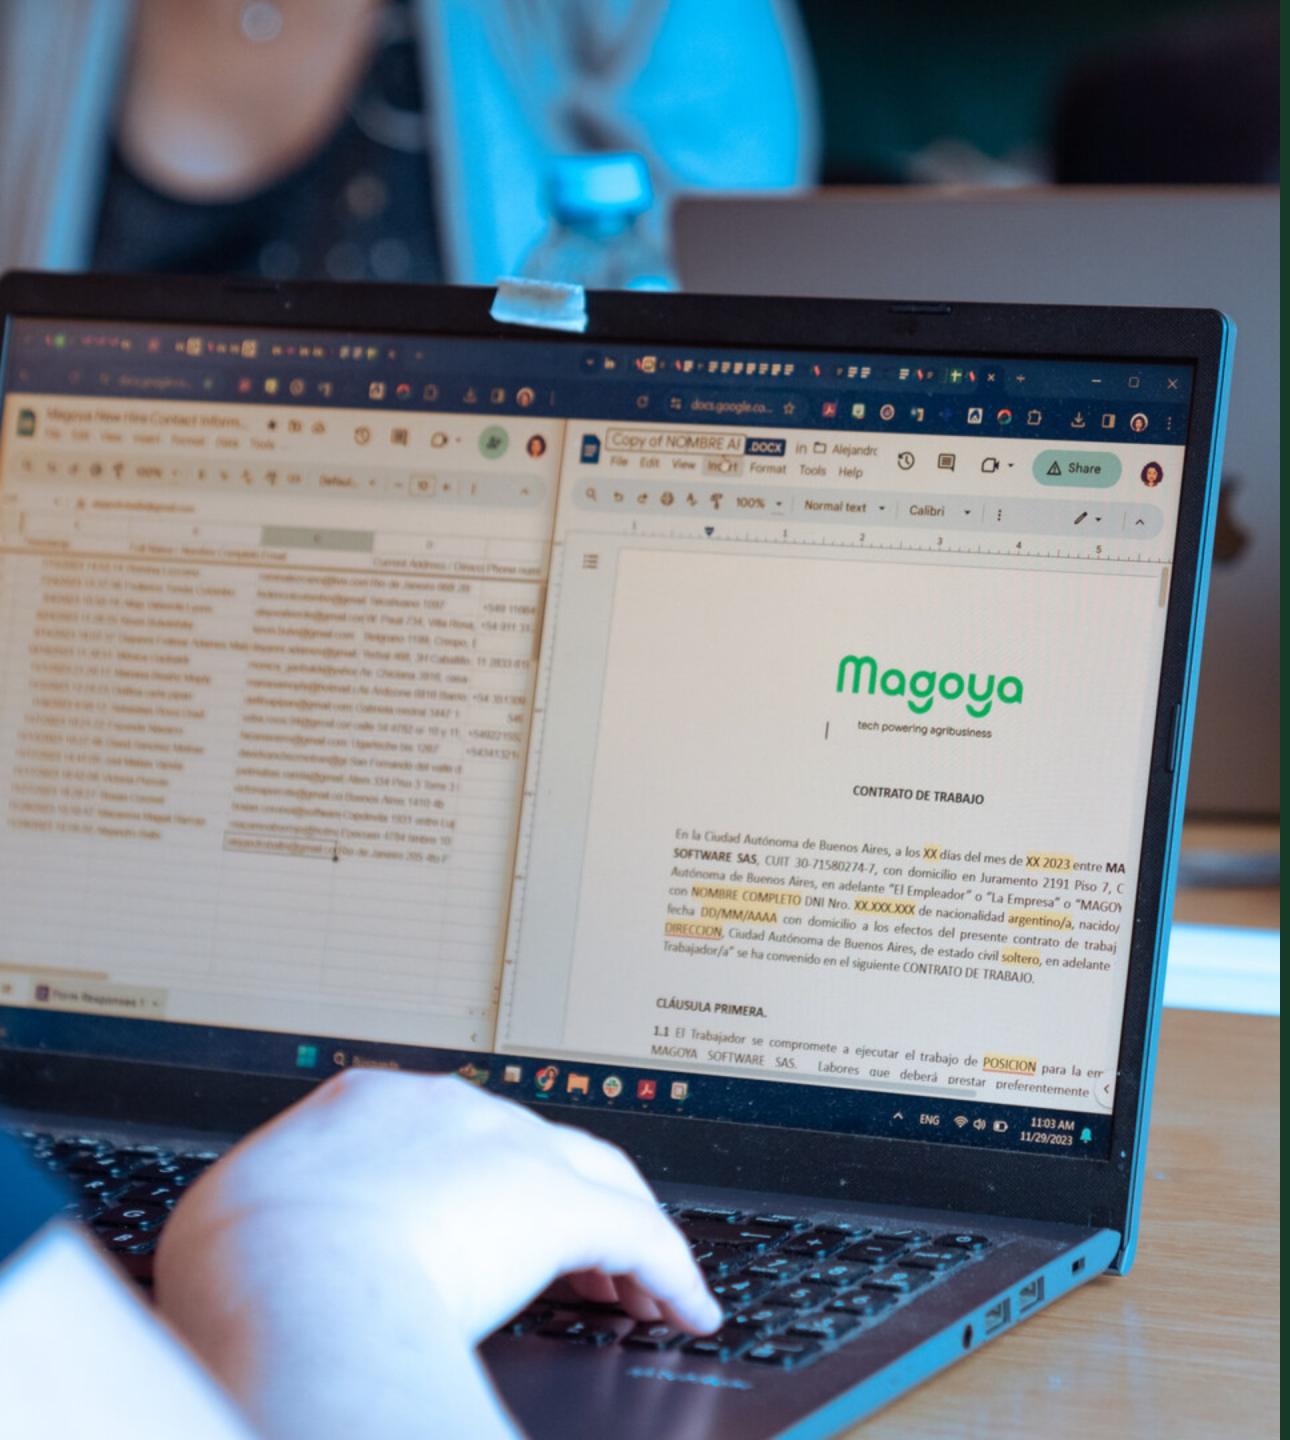

Every piece of work has a hypothesis, a measurement and an outcome tied to a KPI. We don't start without one.

The build and adoption arcs

Ideation, design and engineering — plus people in the field and on the phone running onboarding, support and adoption programs.

Local teams, global experience

Our own teams are deployed across the United States, Brazil and Argentina. Time-zone coverage + cultural support.

Magoya

The Magoya Method

Five stages, from discovery to measurement and evolution.

The Magoya Method

1

Discovery

We immerse ourselves in the problem with stakeholders and users, and analyze the available materials and data.

CLIENT GETS

A shared understanding of the problem and prioritized findings agreed with stakeholders. Closes with a workshop.

2

Ideation

We build solution options together with the client.

CLIENT GETS

Solution alternatives with their trade-offs and a weighted recommendation. Closes with a selection workshop.

3

Planning

We build an execution plan and a measurement strategy, with clear hypotheses and KPIs.

CLIENT GETS

An agreed plan with resources, roadmap, deliverables and expected metrics.

4

Execution

We implement iteratively, with visible progress and adjustments along the way.

CLIENT GETS

Results validated in short cycles.

5

Measurement and evolution

We measure against the agreed KPIs, and what we learn feeds the next cycle.

CLIENT GETS

Evidence of impact and a clear decision: scale, adjust or change course.

Magoya

Clients and reach

The companies moving the industry forward, and where we work.
